Percentage: 95%

INTERNSHIP/TRANING EXPERIENCE

KODEVORTEX, Delhi
Python/ML Intern

- Developed and implemented machine learning models using Python for data analysis and predictive tasks.
- Performed data preprocessing and model optimization to improve accuracy and efficiency.

PROJECTS

Standard Calculator (Python)

- Developed a feature-rich standard calculator supporting basic arithmetic, percentage, and memory functions using Python.
- Implemented input validation and error handling to ensure reliable user interactions.
- Built a clean CLI/GUI interface for intuitive usage and easy extension.

Credit Card Fraud Detection (Python, Pandas, Scikit-learn)

- Designed and implemented a fraud detection pipeline: data preprocessing, feature engineering, and model training using Scikit-learn.
- Trained and evaluated classification models (e.g., Logistic Regression, Random Forest) and tuned hyperparameters to improve detection performance.
- Created visualizations and reports to communicate key insights and model metrics for stakeholders.
